# COULD YOUR CHILD HAVE TYPE 1 DIABETES?

If your child is going to the bathroom more frequently, has increased thirst, is more tired than usual or losing weight, it could be a sign they have Type 1 Diabetes.
If not diagnosed early enough, Type 1 Diabetes can be fatal.
Don't delay - if your child is experiencing any of the 4T's, visit your doctor immediately for a simple test.

Type 1 Diabetes is commonly **mistaken** for:
the flu • strep throat • growth spurt • UTI
